Contractive projections and Seever's identity in complex f -algebras

Comment.Math.Univ.Carolinae 44,2 (2003) 203-215.

Abstract: In this paper we give necessary and sufficient conditions in order that a contractive projection on a complex f -algebra satisfies Seever's identity.

Keywords: vector lattice, σ -Dedekind complete vector lattice, Dedekind complete vector lattice, complex f -algebra, contractive projection
