*The family of  $I$ -density type topologies*

Comment.Math.Univ.Carolinae 46,4 (2005) 735-745.

**Abstract:** We investigate a family of topologies introduced similarly as the  $I$ -density topology. In particular, we compare these topologies with respect to inclusion and we look for conditions under which these topologies are identical.

**Keywords:**  $I$ -density point, family of topologies

**AMS Subject Classification:** 54A10
