Diassociativity is not finitely based relative to power associativity

Comment.Math.Univ.Carolin. 51,2 (2010) 305–317.

Abstract: We show that the variety of diassociative loops is not finitely based even relative to power associative loops with inverse property.

Keywords: loop, diassociativity, equational basis

AMS Subject Classification: Primary 08B05; Secondary 03C05, 03C20
