Algebraic aspects of web geometry

Comment.Math.Univ.Carolinae 41,2 (2000) 205-236.

Abstract: Algebraic aspects of web geometry, namely its connections with the quasigroup and loop theory, the theory of local differential quasigroups and loops, and the theory of local algebras are discussed.

Keywords: quasigroup, loop, web, group, local quasigroup, local loop, Akivis algebra, n -quasigroup
