AC holds iff every compact completely regular topology can be extended to a compact Tychonoff topology

Comment.Math.Univ.Carolin. 52,1 (2011) 139 –143.

Abstract: We show that AC is equivalent to the assertion that every compact completely regular topology can be extended to a compact Tychonoff topology.

Keywords: axiom of choice, compactness

AMS Subject Classification: 03E25, 54A10, 54C45, 54G20
