Weak uniform rotundity of Musielak–Orlicz spaces

Comment.Math.Univ.Carolinae 32,3 (1991) 441-446.

Abstract: We give necessary and sufficient conditions for weak uniform rotundity of Musielak–Orlicz spaces L_φ with the Luxemburg norm. The result is a generalization of a theorem by Kamińska and Kurc.

Keywords: Musielak–Orlicz space, rotundity

AMS Subject Classification: 46B20, 46B25
