*On the regularity of the minimizer of a functional with exponential growth*

Comment.Math.Univ.Carolinae 33,1 (1992) 45-49.

**Abstract:** Minimizers of a functional with exponential growth are shown to be smooth. The techniques developed for power growth are not applicable to the exponential case.

**Keywords:** regularity, minimizers, non-polynomial growth

**AMS Subject Classification:** 49N60, 35J65
