The existence of local homeomorphisms of degree $n > 1$ on local dendrites

Comment.Math.Univ.Carolinae 34,2 (1993) 363-366.

Abstract: In this paper we characterize local dendrites which are the images of themselves under local homeomorphisms of degree n for each positive integer n .

Keywords: local homeomorphism, map of degree n , continuum, local dendrite, dendrite, graph
