On complemented copies of c_0 in spaces of operators, II

Comment.Math.Univ.Carolinae 35,2 (1994) 259-261.

Abstract: We show that as soon as c_0 embeds complementably into the space of all weakly compact operators from X to Y , then it must live either in X^* or in Y .

Keywords: spaces of weakly compact operators, complemented copies of c_0
