A remark on accessible and axiomatizable categories

Comment.Math.Univ.Carolinae 37,2 (1996) 411-414.

Abstract: For categories with equalizers the concepts “accessible” and “axiomatizable” are equivalent. This results is proved under (in fact, is equivalent to) the large-cardinal Vopěnka’s principle.

Keywords: accessible category, infinitary logic, Vopěnka’s principle
