A. Teleiko On extension of functors to the Kleisli category of some weakly normal monads

Comment.Math.Univ.Carolinae 37,2 (1996) 405-410.

Abstract: The problem of extension of normal functors to the Kleisli categories of the inclusion hyperspace monad and its submonads is considered. Some negative results are obtained.

Keywords: monad, Kleisli category, weakly normal functor, inclusion hyperspace, superextension **AMS Subject Classification:** 54B30, 18C20
