***The  $G_\delta$ -topology and incompactness of  $\omega^\alpha$***

Comment.Math.Univ.Carolinae 37,3 (1996) 615-618.

**Abstract:** We establish a relation between covering properties (e.g. Lindelöf degree) of two standard topological spaces (Lemmas 4 and 5). Some cardinal inequalities follow as easy corollaries.

**Keywords:** Lindelöf degree,  $G_\delta$  topology, cardinal functions

**AMS Subject Classification:** 54D20, 45B10
