***Dimension and  $\varepsilon$ -translations***

Comment.Math.Univ.Carolinae 37,4 (1996) 803-808.

**Abstract:** Some theorems characterizing the metric and covering dimension of arbitrary subspaces in a Euclidean space will be obtained in terms of  $\varepsilon$ -translations; some of them were proved in our previous paper [G1] under the additional assumption of the boundedness of subspaces.

**Keywords:** metric dimension, covering dimension,  $\varepsilon$ -translation, uniformly 0-dimensional mappings

**AMS Subject Classification:** Primary 55M10
