The nonseparability of simply presented mixed groups

Comment.Math.Univ.Carolinae 39,1 (1998) 1-5.

Abstract: It is demonstrated that an isotype subgroup of a simply presented abelian group can be simply presented without being a separable subgroup. In particular, the conjecture based on a variety of special cases that Warfield groups are absolutely separable is disproved.

Keywords: Warfield groups, simply presented, isotype subgroup, separable subgroup
